“DESIGNATED INTERPRETERS PROVIDE EFFECTIVE COMMUNICATION

The benefits of providing consistent interpreters applies to nearly every interpreted interaction and setting in postsecondary classrooms and specialized careers. Message accuracy can suffer dramatically when inconsistent interpreters are not familiar with specialized knowledge and vocabulary. The dynamics of interpersonal relationships with having consistent, designated interpreters also plays a role in ensuring interpreting as an accommodation is most effective for the individual, especially in graduate-level courses and professional careers.

There are nearly 200 highly qualified deaf healthcare professionals including all specialties such as Medical Doctors, Dentistry, Veterinarian, Technicians, Nurses, Medical Students, etc.. Designated Interpreters, LLC has provided services to many in their specialties over the last 10 years.
